

**Order of Talks for the 34<sup>TH</sup> Annual Richard D. Katz Undergraduate  
Research Symposium**

**Wednesday, May 2, GIL 190**

**1:00pm-3:30pm**

**Nayla Labban** - Generating a Genetic Profile for the Characterization of Motor Exit Point Glia

**Jess Chandrasekhar** - Novel Murine Model Mimicking Red Meat Allergy Suggests TH2-  
Dependent IgE Response with Significant Inflammatory Skin Pathology and Gut Immune  
Involvement

**Matthew Kustra** - Effects of Local Population Density on Sperm Traits, Growth Rate, and  
Survival of *Anolis sagrei* lizards

**Samantha Fuller** - Characterization of the Role of Poly(A)-Specific Ribonuclease (PARN) in  
Zebrafish Neural Development

**Cynthia Ong** - Costs of Phenotypic Plasticity in Predation Response in *Daphnia pulex*

**15 minute break**

**Cara Giordano** - Age- and condition-dependent expression of ornament coloration in the brown  
anole lizard, *Anolis sagrei*

**Nancy Lee** - NFkB1 activity does not regulate differential glucocorticoid sensitivity in ALL cell  
lines

**Emily Mace** - Human Endogenous Retrovirus in the pathogenesis of human cancer: The role of  
Rec Protein

**Kenneth Kuhn** - Interactions between TNFR1 and p75NTR in the regulation of axon growth
