

Biology Seminar Series

Friday, April 18, 2025

(12:00 - 1:00 pm) Gilmer 390

Jon Resch, PhD

Assistant Professor, Department of Neuroscience and Pharmacology, Iowa
Neuroscience Institute, Fraternal Order of Eagles Diabetes Research Center
University of Iowa Carver College of Medicine

Adrenal steroid regulation of appetite

Corticosteroids exert a significant yet often underappreciated influence on appetite. This talk will present data examining the neural circuits modulated by glucocorticoids and mineralocorticoids that contribute to the control of appetite regulation.

Seminar Host: John Campbell, PhD
